

PRODUCT INFORMATION
Bearing Retainers

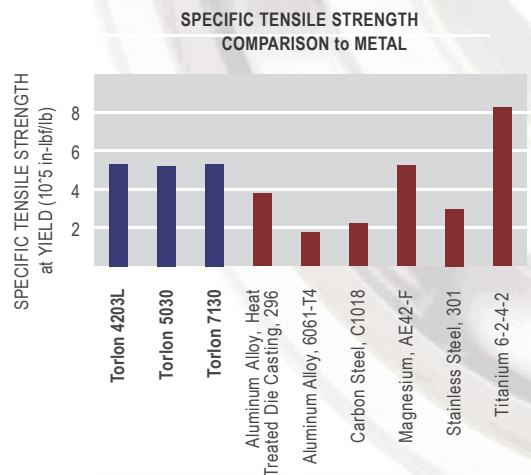

Severe Service Environments
 rely on **Ensinger-Putnam**
 and **Torlon® PAI**

Putnam Precision Molding specializes in injection molding of High Performance Engineered Components. Our experience runs deep in a broad line of polymers that successfully replace metals. Our core objective is to reduce weight and cost while allowing increased design freedom. As a division of Ensinger Industries, we bring the latest High Performance Polymer Technology to the industry. Call us today to find out more about your metal replacement options.

Torlon® is ideal for applications that require:

- Thermal Stability
- High Compressive Strength
- Creep Resistance
- Dimensional Stability
- Self-Lubricating Characteristics

Torlon® PAI is a registered trademark of Solvay Advanced Polymers
